GateX IoT
Fuel Control Systems

GATEX ATG

Real-Time Fuel Inventory Monitoring

Check your fuel stock online, anytime, anywhere.

KEY CONCEPT

AUTOMATIC TANK GAUGING MADE SIMPLE

- Connects any existing level transmitter with Modbus protocol

- Converts second-by-second readings into volumes

- Displays real-time data on HMI for field operators

- Logs data internally and uploads to GateX Cloud at intervals you define

REMOTE & DIGITAL ACCESS

REMOTE DEVICE CONFIGURATION

- Change settings from anywhere

- No limits on calibration entries

NOTIFICATIONS & ALERTS

- System alerts on set fuel levels

- Optional notifications for operational safety

HISTORY & REPORTS

- Track real-time stock and fuel usage

- Web & mobile access to opening/ closing balances

ATLANTA – ROTTERDAM – ISTANBUL - DUBAI

ROBUST & RELIABLE

Designed for Field Conditions

- Operating range: –20° to +73° C

- Fully digital data transmission path

- Robust enclosures for stationary tanks & mobile tankers

DATA MANAGEMENT

Advanced Logging & Upload

- Selective internal memory logging

- User-defined cloud upload intervals

- Ensures continuous and reliable fuel monitoring

ADVANTAGES

Instant Visibility
Real-time stock levels at your fingertips

Reduced Errors
Accurate readings, automated calculations

Secure & Flexible
Web and mobile access, configurable alerts, and notifications
