

FUEL-EYE

Bi-Directional Fuel Control Without Limitations

Fuel-EYE is an embedded fuel controller that manages both fuel receiving and dispensing using a single flow meter. It integrates with all industry standard pumps, dispensers, and meters without requiring any system replacement.

One controller. Complete fuel accountability.

KEY BENEFITS

Cloud Connected

Fuel-EYE connects your existing meters to the cloud

Instant Reconciliation

Real-time, accurate data reconciles in a few seconds

Secure Fueling

Authenticates vehicles, operators and drivers

No Limitation

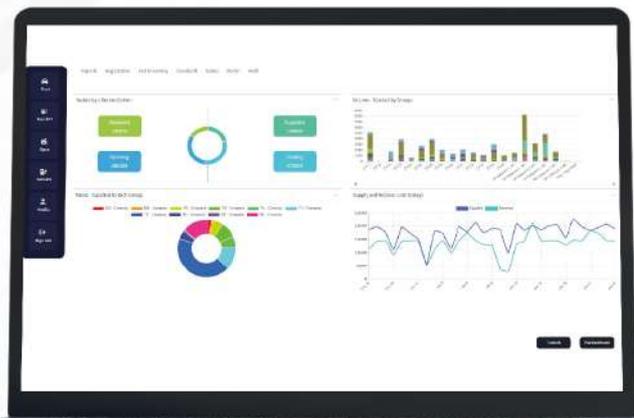

Add vehicles & assets as your projects grow

IDEAL APPLICATIONS

Designed for fuel-intensive operations:

- ✓ Fuel distributors & bulk suppliers
- ✓ Construction & infrastructure projects
- ✓ Fleet owners refueling on-site

RFID-enabled fuel stations

GATEX WIRELESS NOZZLE READER

Integrated with Fuel EYE to prevent fuel theft at the nozzle.

- Stops fueling when nozzle is removed
- Shuts down pump on tag conflict
- Short-range (≤ 5 cm) theft-prevention design

FIVE-LEVEL AUTHENTICATION

Fuel-EYE ensures controlled fueling through:

- Vehicle & operator RFID authentication
- Odometer or engine hours entry
- Optional Area Code & Project Number for project-wise fuel costing

FCS-RP | FUEL RECEIVING CONTROL

Integrated with Fuel EYE to prevent fuel theft at the nozzle.

- Authenticates operator & supplier via RFID
- Displays real-time received volume
- Uploads transactions to cloud with local backup
